

## Press release

# **Elecnor is responsible for the comprehensive engineering and construction of the project, which has an investment of 31.7 million euros**

- Elecnor is charged with the engineering and complete construction of the project which has an investment of EUR 31.7 million
- Guajira I, which will have a power capacity of 20 megawatts (MW), is the second wind farm to be developed in Colombia

**Madrid, 16 September 2020.**- Spanish infrastructure, energy, services and telecommunications group Elecnor continues to expand in the Latin American market by winning its first renewable contract in Colombia. The project encompasses the construction of the Guajira I wind farm, which has a capacity of 20 MW and an investment of EUR 31.7 million. This park is located in the municipality of Uribia — an area with extraordinary wind resources located in the north of the department of La Guajira.

As part of the EPC (Engineering, Procurement and Construction) arrangement, Elecnor will complete all of the engineering, onshore and offshore supplies and the complete construction of the farm. The wind farm will have ten 78-metre-high Vestas turbines, each with a power capacity of 2 MW, which will all be connected to a boosting substation.

Guajira I is the second wind farm to be developed in Colombia following the construction of Jepírachi, which became operational in April 2004. Through this project, the Colombian government returns to its commitment to wind power. Elecnor will develop the park for ISAGEN—a private energy generation and marketing company—whose majority shareholder is BRE Colombia Hydro Investments Ltd.

Currently, the Elecnor Group has 1,744 MW of renewable energy in operation and construction. Furthermore, with the construction of this wind farm, Elecnor continues to consolidate itself as a leading international turnkey project company through EPC agreements.

#### About Elecnor

Elecnor is a leading Spanish business group in the infrastructure, renewable energy and new technology sectors. With over 60 years of continuous growth and a presence in 55 countries, Elecnor operates in various sectors, including electricity, gas, industrial plants, railways, telecommunications, water, control systems, construction, the environment, installations maintenance and aerospace engineering. Elecnor's strong international vocation has led the company to embark on a continuous expansion process that has opened doors to new markets all over the world, mostly in Europe, North America, Central America, South America, Africa, Australia and the Middle East. Elecnor is listed on the Continuous Market and has a team of highly qualified professionals and a workforce of 14,855 employees. In 2019, the company reported revenues of EUR 2.454 billion and a consolidated net profit of EUR 126.4 million. For more information, please visit [www.elecnor.com](http://www.elecnor.com)
